

BOARD-STAFF COMMUNICATION

The Board wishes to maintain open lines of communication with school personnel. Lines of responsibility and authority should not restrict in any way the cooperative working together of all people on all professional levels in order to develop the best possible school program. In the interest of efficiency and good administration, however, the basic line of communication between the Board and all staff members, , will be through the superintendent. However, this will not be construed as denying the right of any staff member to appeal any action or decision of the superintendent to the Board.
